Reasons for Allowance

25. Claims 1-17 are allowed.

26. The following is an examiner's statement of reasons for allowance.

Claims 1, 8 and 15 claim a system and method for processing Internet request comprising the step of receiving an Internet request having a IP address, directing said request to a domain shell for processing said request and binding said request to a particular socket number is documented by the cited prior arts. However, the invention has some particular combination limitations that are different and distinct from prior arts. Among the differences between claimed invention and the prior art of record, the major difference is the combination for processing Internet requests that permits multiple binds to the same socket number at the same time on the same computer wherein receiving a

first and second Internet requests, directing the first request to a first domain processing shell, directing the second request to a second domain processing shell, wherein binding the first and second requests to a particular socket number in a particular computer is novel thus the invention is patentable.
